

## Exploring Bungoma - Eye Witness Accounts

Dear Nekesa (Harvester),

We have just returned from an exploration trip to Bungoma, Kenya.

What we found left us speechless!

As we drove up to the children's home we saw them run up to Justus and Margaret. The love expressed in this moment was beyond words. We experienced the attachment these children have to them. These children know that they are loved!

We found the home and grounds to be in great condition. There was nice landscaping and a place for the children to play safely outside. Inside we found that each child has an impeccably clean and nice place to live. Each child has their own well made bed.

There are 34 children that your support is providing this home for. There is no support from local or national governments. You are also providing education by paying for these children to attend school since in Kenya a fee is required to send your children to school. In speaking with the children, we asked them what they would like to be when they grow up. Many said they would like to be a doctor, a surgeon, an engineer, or a journalist. These children know they have a future! If it was not for your financial support of this ministry they would be living on the streets!

There are many "Street Kids" who have no home or future. During our time in Bungoma we learned that Justus and Margaret have a ministry to the street kids in Bungoma. The street kids live a life of hunger, addiction to sniffing glue, and the struggle to stay alive for tomorrow. Justus has been paying a local restaurant to close their operation for about an hour to allow the street kids to come in and eat. It is through your giving that these kids are fed and given a full stomach at all. I heard Justus speaking to these kids from the love of The Father. He was trying to see if any of them would like to get out of that life. His desire is to set up a foster home and get them free from the addiction of sniffing glue, the life of pain and struggle, and give them a hope and future.

There have been a few rescued! We prayed with the street kids and saw the true gratitude they have to Justus for the food, new clothes provided for them, and the love he shows them.

Your financial support has made it possible to bless them in this way. Our ultimate goal would be to build a Rehabilitation Center which is required by the Kenyan government for Street Kids. The Children's Home is also regulated and inspected but not financially supported.

If it was not for your support this would be the life of the orphans from our children's home. Through your giving, you have provided a home with love, clothing, their own beds, and an education that prepares them for the future they dream of. We would love to expand the amount of children we can take into the house, especially for the orphaned girls. Land, building with required electric and water, and staff is required.

We have seen first hand the good soil that your seeds are planted in, and we see the great fruit that that is coming from it.

If you are not a monthly partner with Bungoma Bible ministries, we would like to ask you to prayerfully consider planting your seed into this good ground. Your seed will come forth with good fruit as we have seen from our faithful partners.

You too can be a part of changing the future of Kenya (the uttermost part of the earth to us) through these little ones who are being raised in The Word of God.

If you are already a monthly partner and you ask, "How can I help?" We would like to ask if you would be willing to host Jusutus and Margaret in your home to speak to a group of friends and family that you can invite over for lunch, dinner, or a social gathering. Allow them to share the video of how this ministry is changing Kenya. As you love the fruit of this ministry, we know you will share with others about the good ground they too can be a part of.

Justus and Margaret
